Before you begin

Check your gauge and keep your stitches relaxed. The faux-knit texture becomes much easier to see when the fabric is worked evenly rather than tightly.

Step-by-Step Pattern

Pattern overview

This guide focuses on the construction and finishing approach described in the CrochetLyfe article. Work patiently, count your stitches at the end of each round, and adjust the hook size if your fabric feels too stiff or too loose.

Band / Foundation

Row 1: Make a foundation chain long enough to fit comfortably around the intended head circumference. Join carefully without twisting the chain if you are working in the round.

Row 2: Work single crochet stitches around the foundation. Join with a slip stitch. Keep the band flexible rather than tight.

Rows 3 onward: Continue the band until it reaches your preferred depth. Working through the back loop can add a ribbed appearance and extra stretch.

Main Faux-Knit Texture

Round 1: Begin the main body above the band. Work the textured stitch pattern evenly around, following the stitch sequence used in your selected faux-knit construction. Place a marker at the beginning of the round.

Round 2: Repeat the established texture. Take your time with each stitch so the vertical ridges remain consistent.

Round 3: Continue around without increasing if the beanie is fitting correctly. Check that the fabric is lying smoothly.

Texture check: the raised stitch structure should create a knit-like surface as the rounds build.

Step-by-Step Pattern — Continued

Building the Hat

Round 4: Continue the faux-knit stitch pattern around the full circumference. Keep the same tension you used in the earlier rounds.

Round 5: Repeat the texture sequence. If your stitches are becoming tight, pause and relax your hands before continuing.

Rounds 6–10: Continue repeating the established round until the hat reaches the desired height. For a slouchier fit, add additional rounds.

Shaping the Crown

Once the beanie reaches the desired height, begin reducing the circumference gradually. Place your decreases evenly around the round so the crown closes smoothly.

Decrease round: Work the established stitch pattern until the decrease point, then combine the next stitches according to your chosen decrease method. Repeat evenly around.

Next round: Work the texture between decreases. Continue alternating regular and decrease rounds as needed.

Final rounds: When only a small opening remains, cut the yarn leaving a generous tail. Pull the tail through the remaining stitches and tighten gently.

Finishing

• Weave the yarn tail securely through the inside of the crown.

• Trim excess yarn only after the end is secure.

• Lightly shape the beanie with your hands; avoid stretching the texture aggressively.

• Add a faux-fur pom-pom if desired, securing it firmly to the crown.

Beginner Tips

• Count stitches at the end of every round while you are learning the pattern.

• Use stitch markers to identify the beginning of each round.

• If the fabric feels very firm, try the larger hook.

• If the hat feels too loose, try the smaller hook or reduce the finished circumference.
